TRAININGS / CERTIFICATIONS

- DSMP2.0** Jan 2025 - Present
CampusX, [Virtual]
This course has been guided me through my Machine learning and MLOPS journey.
- Explore Machine Learning Using Python** Dec 2024
Infosys Springboard, [Virtual]
Completed Infosys Springboard course on Machine learning.
- Machine Learning With Python** Dec 2024
Great Learning, [Virtual]
Completed machine Learning Python course from great learning platform.
- CS50 Harvards** Nov 2022 - Dec 2022
Harvards University, [Virtual]
Completely done the cs50 course and made various programs using the course features like using there scratch feature was one of it .

SKILLS

Technical Skill

- Programming Languages: Python, C, SQL.
- Data Manipulation Tools: Numpy and Pandas
- Data Visualization Tools: Matplotlib, Seaborn, Plotly
- Machine Learning Tools: Scikit-learn , Tensorflow modules
- Data Structures & Algorithms: DSA concepts and their applications.

EDUCATION

- B.TECH in Computer Engineering
[Dr.Babasaheb Ambedkar Technological University, Lonere]
 - Current Year : 4th Year, 7th Semester
 - Current CGPA : 6.95/10 till 6th Sem
- MHT-CET SCORE : 91 Percentile
- HSC(12th Grade) - 86.2% 2019-2021
- SSC(10th Grade) - 85% 2017-2019

SUMMARY

Passionate about ML and Deep Learning, with solid DSA skills and hands-on experience in Python, SQL, data visualization, and AI project development.

RELEVANT COURSEWORK

- Operating Systems
- DSA with C
- OOPs with java
- Machine Learning & Deep learning
- Computer Network
- DBMS
- Data Visualisation
- Python & SQL

PROJECTS

Multimodal RAG Assistant [↗](#) Youtube link ->  Sep 2025

- Developed** an **offline** Multimodal Retrieval-Augmented Generation (RAG) System capable of understanding and reasoning across **multiple data types** (text, images, audio, PDFs, DOCX, screenshots, recorded calls).
- Enabled** natural-language and voice queries, providing grounded, explainable responses with citation transparency to **enhance user trust and comprehension**.
- Implemented** a context-aware solution allowing local LLM deployment and customization based on user specifications.

Crypto Derivative Analysis [↗](#) Aug 2025

- Analyzed** cryptocurrency trading behaviour (profitability, risk, volume, leverage) against overall **market sentiment** (fear vs. greed).
- Identified** hidden trends and signals to inform **smarter trading strategies and optimise risk management**.

Google Trend Analysis [↗](#) Jan 2025

- Developed** a trend classification and recommendation system leveraging Google Trends data.
- Applied** NLP embeddings with KMeans clustering to categorize trends and trained Machine Learning models to predict trend popularity.
- Visualized** key insights and trend patterns using Plotly.

House Price Prediction [↗](#) Dec 2024

- Performed** extensive data cleaning and preprocessing to prepare data for machine learning models.
- Applied** multiple ML algorithms, **achieving an accuracy of 88%** with optimized models for house price prediction.

Research on Software Development Methodologies [↗](#) Oct 2024

- Conducted** in-depth research and **provided** insights on various software development methodologies, with a particular focus on Agile practices.
- Presented** a real-life example of the Agile workflow, **demonstrating its practical application**.

Smart India Hackathon Participant [↗](#) Jul 2024 - Oct 2024

- Contributed** to a research-focused team, developing a deep learning model for converting SAR images into colourful images to **enhance insights and analysis**.
- Conducted** in-depth research and **performed** essential image processing tasks for the project.

Research on Natural Language Processing (NLP) [↗](#) Aug 2024

- Conducted** in-depth research on advanced NLP techniques and their real-world applications.
- Delivered** a seminar presentation on the **potential and applications of NLP** in various industries.
